

## Senior Linux Developer

---

### Job description

As a Senior Linux Developer at Uplogix, you will work alongside both the hardware team and the application developers. You will be critical for new hardware bring-up. You will write and maintain key Linux drivers and microcontroller code.

### Key responsibilities

- Ensure successful integration of new hardware platform
- Lead the integration of existing hardware and software platforms
- Enhance product performance and reliability

### Requirements

- 5+ years experience building and maintaining low-level Linux kernel development
- Very strong C programming skills
- Familiarity with user/kernel debug tools and strategies under Linux
- Knowledge of standard PC architecture (processors, chipsets and their features)
- Familiarity with Ethernet, USB, I2C/SMBUS, and serial port technologies
- Experience programming embedded microcontrollers
- Ability to learn and adapt quickly with little direction or oversight
- Bachelors degree in Computer Science or Computer Engineering

### Desirable Qualifications

- Familiarity with Fedora, Anaconda, and RPM
- Familiarity with Linux modem software (PPP and mgetty)
- Previous employment in a fast paced environment

### Additional Information

Candidates must be authorized to work in the US as permanent residents. We are not offering relocation or sponsorship.

### About Uplogix

Uplogix provides the first fully-integrated remote management solution. Our co-located management appliances automate routine administration, maintenance and recovery tasks—securely and regardless of network availability. In comparison, traditional network and systems management depends on the network, uses multiple tools, and remains labor intensive. Uplogix puts the power of your most trusted IT administrator everywhere, all the time.

Uplogix is privately held and headquartered in Austin, Texas with European offices in London. For more information, please visit [www.uplogix.com](http://www.uplogix.com).
