

## Senior Linux Developer

---

As a software developer, you will be joining a small agile development team. You will work with the hardware and software teams to support our applications on all platforms.

Our products include the Uplogix Automated Remote Management (ARM) appliance and the Uplogix Control Center (UCC). The Uplogix appliance is custom hardware running a Java application on Linux. The appliance manages network devices (routers, switches, firewalls) through their console port. The UCC handles configuration, monitoring, and reporting for hundreds of Uplogix appliances.

### Key Responsibilities

- Integrate third party software into Uplogix solutions
- Customize OS and installer for new hardware platforms
- Enhance product performance and reliability

### Key Qualifications

- BS in Computer Science or equivalent experience
- 5+ years of C programming experience
- Strong scripting abilities (ex. Python, Sed, AWK, Bash)
- Familiarity with user/kernel debug tools and strategies under Linux
- Candidate should learn quickly and perform with little oversight

### Desirable Qualifications

- Familiarity with Java and JNI
- Familiarity with Fedora, Anaconda, and RPM
- Familiarity with Linux modem software (PPP and mgetty)
- Experience building and maintaining Linux kernel modules
- Familiarity with Ethernet, USB, I2C/SMBUS, and serial port technologies
- Experience programming embedded microcontrollers
- Startup experience

### Additional Information

Candidates must be authorized to work in the US as permanent residents. We are not offering relocation or sponsorship.

Please send your resume and cover letter to [devjobs@uplogix.com](mailto:devjobs@uplogix.com) or fax to 512.857.7002.

No phone calls please.

### About Uplogix

Uplogix provides the first fully-integrated remote management solution. Our co-located management appliances automate routine administration, maintenance and recovery tasks - securely and regardless of network availability. In comparison, traditional network and systems management depends on the network, uses multiple tools, and remains labor intensive. Uplogix puts the power of your most trusted IT administrator everywhere, all the time.

Uplogix is privately held and headquartered in Austin, Texas with international offices in London and Monterrey. For more information, please visit [www.uplogix.com](http://www.uplogix.com).
